LUMA INSTITUTE™

Introduction:

I have been fortunate to gain recognition in UX Design, Interaction Design, and Design Systems at both strategic and execution levels. With extensive experience working alongside dynamic teams, I have developed a deep understanding of design principles and successfully implemented scalable design systems for large enterprises. My expertise spans design strategy, co-creation, and emerging technologies, including agentic/ Generative AI, and AR/VR, ensuring that innovation aligns seamlessly with business objectives and user needs.

Beyond design execution, I thrive in leading and mentoring UX teams—fostering collaboration, driving strategic alignment, and cultivating a culture of creativity and innovation. I bring a structured yet adaptable approach to integrating UX methodologies into complex ecosystems, ensuring that design solutions are both user-cantered and technically scalable. My experience in custom built LLMs and AI-driven design frameworks allows me to push the boundaries of digital experiences, creating impactful and intuitive interactions.

I am passionate about design systems architecture, atomic design, and usability testing, ensuring consistency and efficiency in product development. My approach emphasizes data-driven decision-making, human-centred insights, and interactive prototyping, bridging the gap between design vision and implementation.

Committed to creating cohesive and meaningful digital experiences, I focus on delivering solutions that enhance usability, drive engagement, and create lasting value for both users and organizations. Leading high-performing teams to execute user-centric strategies with precision, innovation, and measurable impact is a responsibility I embrace with dedication and vision.

Designer's Toolbox

- **Design Methodologies:** Design Thinking, Co-Creation, UX/UI Design, IxD, Personas, Information Architecture Design Systems: Architecture, Atomic Design, Emotional Design, Interaction Design
- **User Research & Testing:** Usability Testing, Research Enablement
- **Skills & Technologies:** High-Fidelity product visualisation, wireframing & Prototyping UI/UX & Interaction Design, Figma, FigJam, Locofy, Dora.run, JitterDesign Systems & Prototyping: Sketch, InVision, Craft-DSM Adobe Creative Suite: Photoshop, Illustrator Prototyping & Motion Graphics: Balsamiq, Axure RP 7, ProtoPie, Lottie.js, Adobe After Effects, BodyMovin, Rive Code & Web Technologies: Atom, HTML, CSS, etc.
- **Generative AI & Emerging Tech**
AI-Powered UX & Prototyping: Brain.js, Ulzard (Miro Prototyping), MidJourney, ChatGPT, Cassidy AI etc.

PROFESSIONAL SUMMARY

As a seasoned UX leader with extensive experience in design strategy, strategic thinking, and co-creation. I specialize in crafting user-centric designs and exploring emerging technologies, including agentic and GenAI. My focus includes integrating large language models into the UX workflow and developing innovative AR/VR experiences for high-net-worth individuals.

KEY HIGHLIGHTS

- **Design Strategy:** Expertise in developing comprehensive UX strategies aligned with business goals.
- **Strategic Thinking:** Strong ability to integrate UX initiatives with organizational objectives.
- **Co-Creation:** Proven experience in collaborative design processes.
- **Emerging Tech and new provocations:** Deep understanding of leveraging large language models in UX and exploring AR/VR for unique user experiences.
- Focus on **user testing** for latent supporters and integrating AR/VR experiences for smartphone-enabled banking to create unique experiences for high-net-worth individuals.
- **User-Centric Design:** Commitment to intuitive and accessible designs that prioritize user needs.

INDUSTRY INVOLVEMENT: ENGAGING THE DESIGN TALENT OF TOMORROW

I have had the privilege of mentoring and guiding 1st and 2nd year BSc Design students at Strate design school in Bangalore. As a Jury faculty member, I evaluated their IxD projects, providing industry expertise and feedback. I fostered a collaborative environment, offering guidance on user-centred design principles. Witnessing their growth and creativity has been inspiring. Explore my portfolio to see the impactful projects we worked on together.
